

How to Read Your New Water Bill

The new radio frequency meters read in cubic meters. At the time being our current software doesn't allow for decimal places so we need to explain how to read your new bill.

TOWN OF DUNDURN
BOX 185, DUNDURN, SK S0K 1K0

UTILITY BILLING		379009
Date Issued:		October 1, 2011
Account Number:		[REDACTED]

ACCOUNTS IN ARREARS ARE SUBJECT TO DISCONNECTION WITHOUT NOTICE AND WILL NOT BE RECONNECTED UNTIL ACCOUNT IS PAID IN FULL, IN ADDITION TO \$50 RECONNECT FEE (BYLAWS 12-2011)

Under usage you will likely see a 4 to 5 digit number. This should be read in this manner 18.672 cubic meters.

Next the water rate should be read in this manner.
1-9.091 cubic meter is \$50
9.092 – 9999.999 cubic meters is \$3.30 per cubic meter.

TO CALCULATE THIS BILL USING 18.672 CUBIC METERS.

$$18.672 - 9.091 = 9.581 \times \$3.30 = \$31.62 \text{ overage plus } \$50 \text{ base} = \$81.62$$

TO CONVERT THIS CALCULATION TO GALLONS

$$18.672 \times 220 = 4108 \text{ gallons} - 2000 = 2108 \times 1.50/100 = \$31.62 \text{ overage plus } \$50 \text{ base} = \$81.62$$
